

ACHIEVE OPERATIONAL EXCELLENCE

FocAlyze is a hierarchical system, exclusively from HumeraTech, that assigns importance, performance and energy metrics to direct attention to the issues that impact your systems overall performance the most.

EXCELLENT
70%-100%

The FocAlyze system graphically represents intelligent building systems, energy systems, mechanical systems, communications systems and networking systems to help you manage and maintain peak performance.

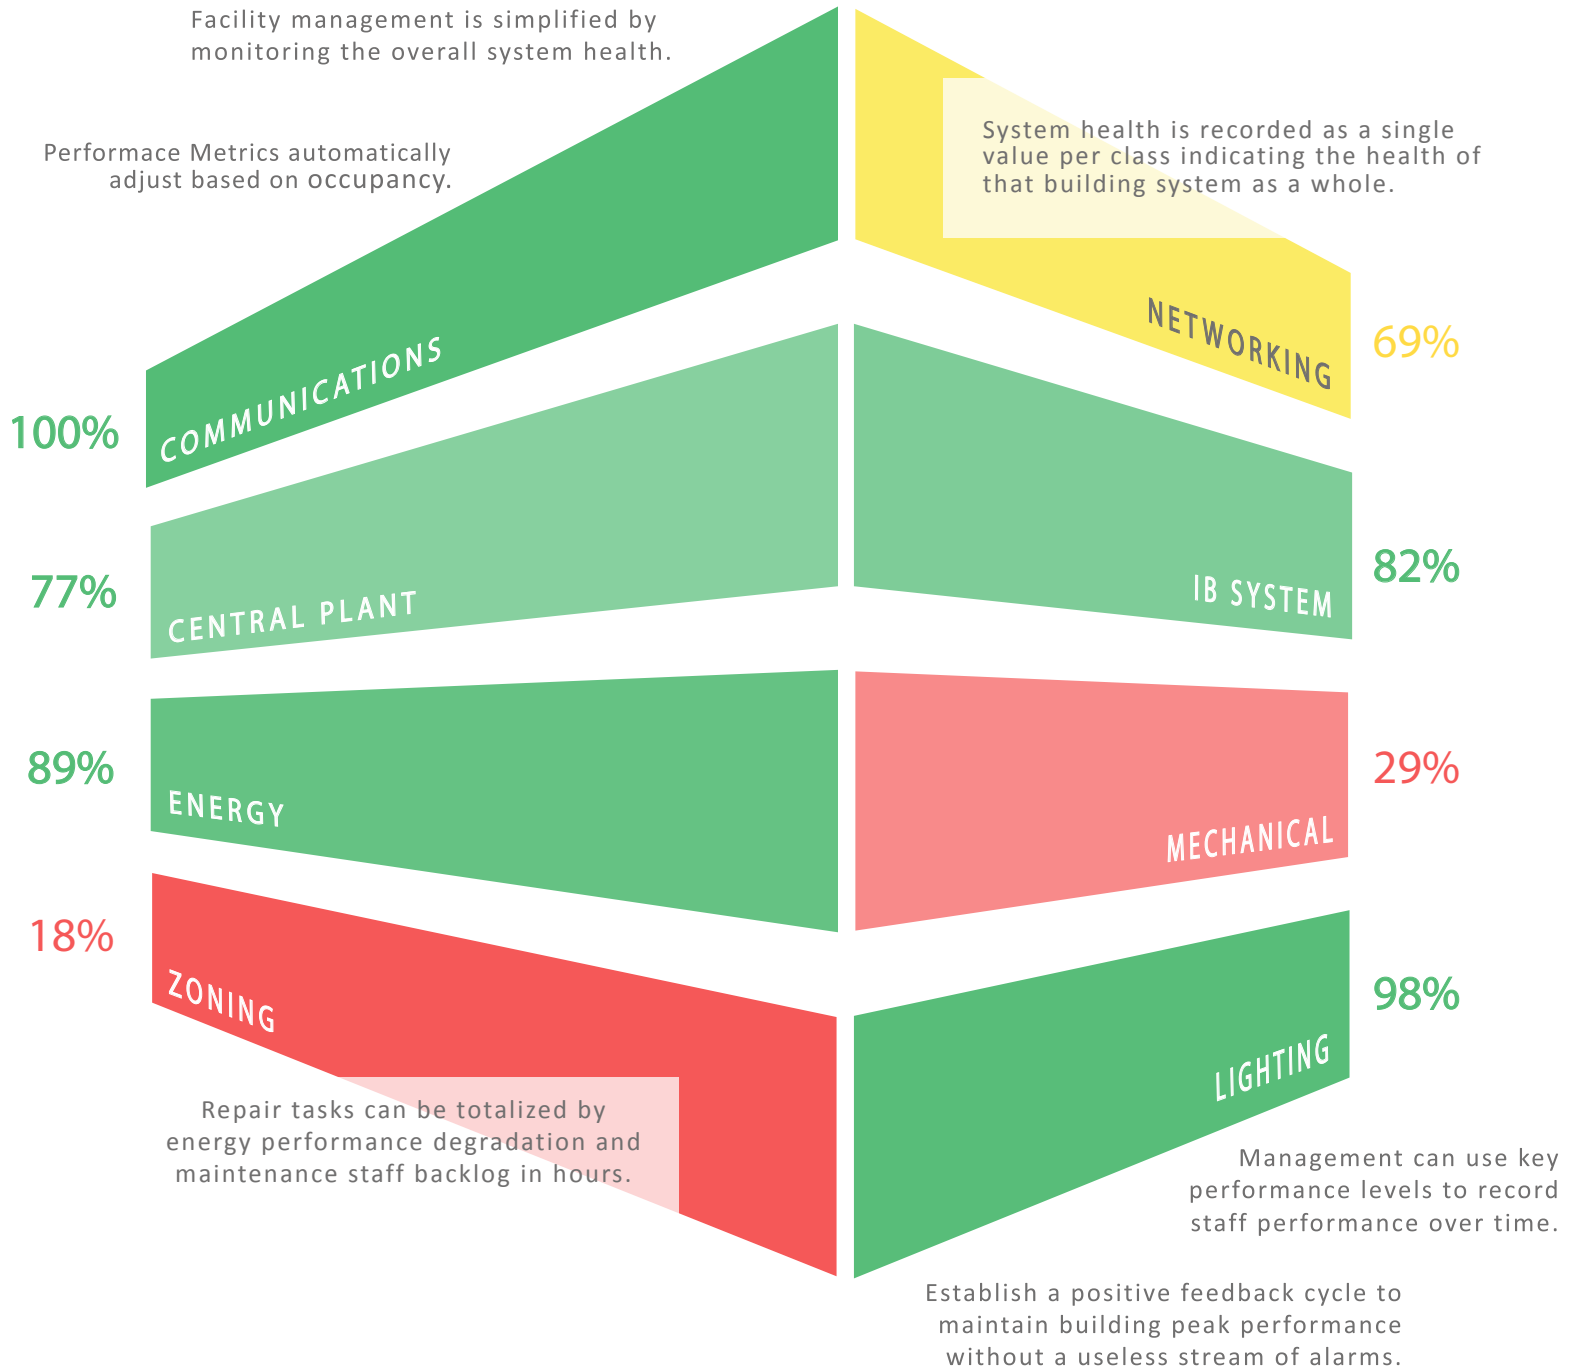

AVERAGE
30%-69%

Each system has its own hierarchal values that initially alert internal staff at defined low performance values and then alert external staff with an optional auto dispatch feature. Staff is directed by the importance of the system problem to provide attention to the most critical system first.

CRITICAL
0%-29%

Now you can focus, analyze and resolve issues on the highest priority systems, and then direct your attention to the next hierarchical group.

70% FOCALYZE
